Getting Started

- **Set up a specific project:** like SheFi Contracts instead of SheFi
- **Save your instructions:** Explain how to do the work and your requirements for the result
- **Create your context brain:** Keep your context and work in a place that can connect to any AI tool
- **Connect your tools:** Connect the apps needed for your task and review their permissions
- **Try one task:** Define the outcome and specify which actions need your approval

SheFi

Work with AI

- **Give it relevant context** by calling out files and connectors it needs
- **Share examples or design references** and explain what to follow as a standard
- If a **long chat keeps losing details,** start fresh with a reviewed summary
- **AI hallucinates!** Verify important claims against original sources and test workflows
- **Keep a human in the loop** by building in a review
- **Save what works:** Keep approved outputs and useful decisions **in your context brain**
- **Improve it:** Ask AI to turn your corrections into a better prompt or instructions
- Update prompts and skills as your work changes **= vibe maintaining**

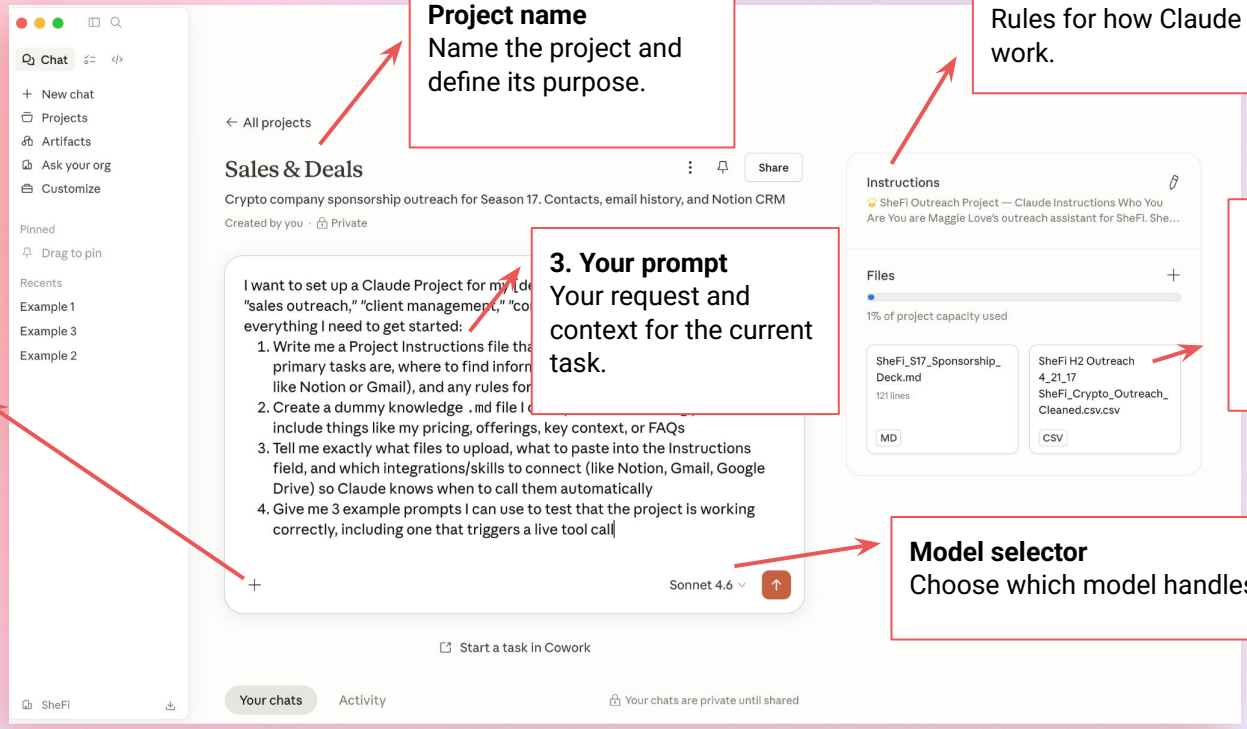

SheFi

My Personal AI Stack

- **Wispr Flow** for voice input
- **Granola** for meeting notes
- **ChatGPT and Claude** for conversations and research
- **Claude Cowork** for delegated work
- **Claude Code or Codex** for building workflows
- **Notion** for my context brain
- **Plugins** connecting AI to the apps where my work lives
- **Agent experiments:** Hermes, Grok Bot, Muse and Instinct

SheFi

Projects: Claude as an Example

Project name
Name the project and define its purpose.

2. Project instructions
Rules for how Claude should approach the work.

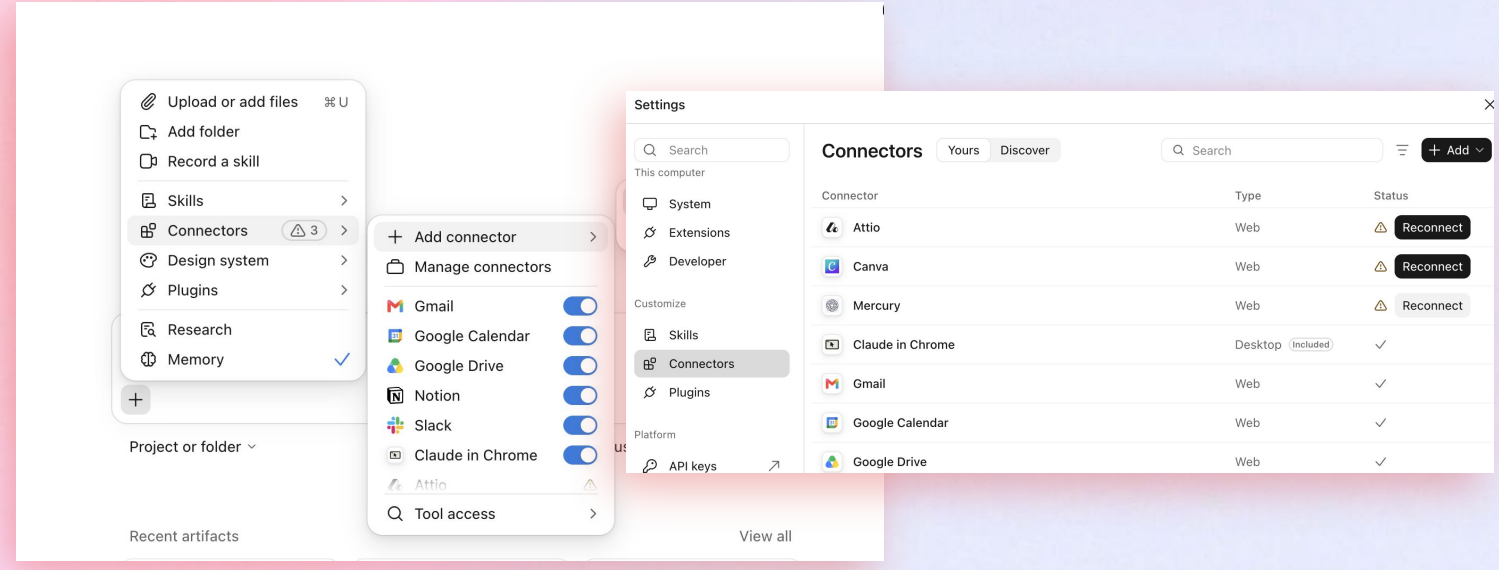

3. Your prompt
Your request and context for the current task.

1. Project files
Reference material available to chats in this project.

Attachments
Files added to this conversation.

Model selector
Choose which model handles the task.

Getting Plugins Connected: Claude

Browse connectors from the + menu in the chatbox, or open Settings → Connectors

Choose an app → Connect → Sign in and review access → Try a simple task

SheFi

You Can Do This Today

1. Connect your calendar, email and notetaker
2. Choose where you want your update, such as Slack
3. Copy this prompt and try it

Try this prompt

Review my calendar for the next 48 hours in [TIME ZONE]

Tell me who I'm meeting, the purpose and what to prepare

Create a short brief for each meeting using relevant emails, meeting notes and documents from my connected apps

Include past decisions, open commitments and questions to discuss

Link to sources and flag missing information instead of guessing

Show me the update for review before posting to [DESTINATION]
